

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

VI. *An Account of several Curiosities relating to Amber, lately sent to the Royal Society from Philippus Jacobus Hartmannus (Author of the Account of it published last Transaction) and which are now in their Repository at Gresham-College.*

1. **F**rustum quod variam concretionem Succini corticatum cum armatura auri exhibet.
2. Frustum album sale volatili abundans, ut sapor salis linguam afficiat.
3. Frustum insignis duritiei cum sapore vitrioli.
4. Frustum in quo insignis cavitas aquæ plena.
5. Frustum in quo lignum fossile.
6. ——— in quo festucæ quasi abiugnæ.
7. ——— quod fibras ligneas matricis in qua situm fuit, exhibet.
8. Gutta oblonga.
9. Gutta oblonga altera.
10. Gutta succinea.
11. Gutta minor.
12. Gutta minor altera.
13. Feretrum aliquot muscarum.
14. Feretrum araneæ.
15. Litera F primordium musivi ex succino operis.

SUPERIUS.

VII. *Part of a Letter of Mr. Dale from Braintree, Feb. 1. 1699. to Dr. Martin Lister, Fellow of the College of Physicians and R. S. concerning feveral Insects.*

HErewith you will receive a *Cervus volans* or two, which I take to be different from those described by *Moufet* in his *Theat. Insect.* p. 148, 149. these are plentifully found about *Colchester*, especially towards the Sea-Coast. Besides these I have happened upon divers sorts of Scarabs, which I cannot find figured in your curious *Tabulæ Mutæ* in the Appendix *Hist. Animal. Angl.* as the Βένετος *Moufet.* p. 152. a Species or two of *Cantharides*, three or four sorts of *Lady Bugs*, and others; which, although of most of them I have at present but single *Specimens*, yet if you desire the sight of them to design and fill up the Vacancies of your Plates with, they shall be sent up to you. Last Summer being on our Sea-Coast at *Harwich*, I observed no less than five or six Species of *Cochleæ Marinæ* two of which I have since found to be already noted by you in your excellent *Hist. Conchyl.* as of English Production, viz. *Sett.* 5. n. 19. and 43. A third I have which is by you figured, viz. n. 13. but is not marked as found in *England*. The fourth agrees with your n. 8. in Figure, but having no Name, I cannot be positive, I therefore desire your Name of it:

This
